 Wardens of the Merchants, for Benjamin Mead read Thomas Mead.

The EXPLANATION of the ALMANACK.

IN the KALENDAR, The 1st Column, being the Days of the Year, shows at one Subtraction the Number of Days between any two in the Year. Suppose from March 10 to Sept. 15. At March 10, I find 70; and at Sept. 15, I find 259. From which subtracting 70, I have 189 the Number of Days required. To find the Weeks in this Time, I divide 189 by 7, and the Quotient gives the Answer, viz. 27 Weeks exactly. *N. B.* In Payments of great Sums where they count by the Days, even Leap-Year is supposed to have only 365 Days.

The other Columns are read thus.

For Example; January the 1st Day happens on Saturday, and is the Feast of Circumcision. The Sun rises at 9 min. past 8 in the Morning; and sets at 9 min. before 4 at Night. It is the 15th Day of the Moon's Age. It is also the 14th Day of January, in all these Countries abroad, where they reckon by the new Style. And good Clocks or Watches, if set by the Table of Equation, will go 8 min. 47 sec. faster than a true Sundial. In that last Column, F. stands for FASTER, and S. for SLOWER. Noon is best Time for comparing your Clock or Watch.

Some useful TABLES follow the KALENDAR, viz.

1. **A** Tide-Table, explained Page 19.

2. A Table of Purchase, Page 20. Example, To know what a yearly Rent of 21 Years is worth in ready Money at 7 per Cent, Opposite to 21 in the Margent, and under 7 per Cent, I find 10 Years, 10 Months, i. e. It is worth 10 Years and 10 Months Rent, paid in Hand.

3. A Regat Table, Page 21.

4. A Table calculated for paying a Company of Foot in Ireland. In Pounds, Shillings, Pence, Farthings, and seventh Parts of a Farthing, Pages 22, 23. Example, To know the Pay of 33 Centinels for 4 Weeks or 28 Days; opposite to 33 Centinels, and under 4 Weeks or 28 Days, I find the Answer, viz. 18/ 14 s.

5. A Table of the Weight of Bread, Page 24.

6. A Table of Twilight, Page 25, and is read thus: As on January 1,

Morning Twilight begins 55 min. after 5. Evening Twilight ends 5 min. after 6. The Length of Twilight is 2 Hours 14 min.

7. A Table of Interest at 7 per Cent, Page 25.

8. A Table of Coin, with an Explanation of the Gold Weights, Page 27.

9. A Table of the Price of Goods by the long Hundred, set down as low as the half Farthings per Pound, Pages 28, 29.

After these Tables there are set down the Marriages and Issues of the Princes of Europe; the Deaths of the late Ones; and several Names of Persons in great Trust, &c. with the Roads and Fairs of Ireland. In all which I have endeavoured to be as exact as possible, and have even spent a good deal of Time, to get some other Things inserted, which would have been of good Use if I could have got them perfect.

To find when it will be high Water at the Bar of *Dublin*, as
by Example on the 11th of *Decem.* this Year, in the Column of
the Moon's Age, I find her 5 Days old, then looking for the
Bar of *Dublin* in this Table, and 5 Days old in the first Co-
lumn, in the Angle of meeting I have 2 30, which shews that
at 30 *Min.* after 2 in the Afternoon it will be high Water there.

F I N I S.

I Purpose, God willing, to set *ALL THE FAIRS OF IRELAND* right for another Year, if I receive the Accounts of them before Nov. 1732. and I think I have printed them here readier for Use, than ever I saw the fairs printed before, *EITHER OF THIS, OR OF ANY OTHER KINGDOM.*
JOHN WATSON.
